

# Dekorra Comprehensive Plan

## Map 8 Dekorra Soil Suitability for Conventional On-Site Waste Disposal Systems

- Sanitary District
- Utility District
- Municipal Boundaries
- Roads
- Severe
- Moderate
- Slight

Note: This map is for general informational use only, and is not to be used to obtain detailed siting information.

Note: Ratings of soil suitability do not indicate public policy of where new development may be appropriate. Classifications are based on average slope, depth to soil saturation, average depth to bedrock, and flooding potential. Soils series categorized as marsh, alluvial, water, gravel, or stony are also classified least suitable for any type of system development.

**NOTE: This map is identical to that included in the Town's 2005 Comprehensive Plan. The Town did not feel the need to update this map for the 2012-14 updated Plan. Some boundaries may not be up to date.**

Adopted May 10, 2005
